SUMMARY

Cloud and DevOps Engineer with hands-on experience designing, automating, and securing cloud-native infrastructure on AWS using Terraform, Docker, Kubernetes, ECS, Jenkins, and GitHub Actions. Proven track record building end-to-end CI/CD pipelines, implementing Infrastructure as Code (IaC), and enforcing DevSecOps practices with integrated security scanning and observability. Skilled in Linux administration, networking, automation scripting (Bash/Python), and driving scalability, high availability, and security across cloud environments.

EDUCATION

Sarala Birla University

B.Tech – Computer Science and Engineering | CGPA: 9.45 / 10

Ranchi, Jharkhand, India

2023 – Present

TECHNICAL SKILLS

Cloud Platforms (AWS): EC2, S3, VPC, IAM, RDS, Route 53, CloudFront, ALB, ACM, AWS WAF, ECS, ECR, EKS, Lambda, EventBridge, SNS, CloudWatch

Infrastructure as Code: Terraform, Helm

Containers & Orchestration: Docker, Kubernetes, ECS, ArgoCD

CI/CD & Automation: Jenkins, GitHub Actions, GitOps, DevSecOps

OS & Networking: Linux, Bash, Networking (DNS, HTTPS, Load Balancing, VPC Routing)

Monitoring & Observability: Prometheus, Grafana, CloudWatch

Security & Quality Gates: SonarQube (SAST), Trivy (CVE Scanning), IAM Least-Privilege

Scripting & Programming: Python, Boto3, Java, JavaScript, SQL

Version Control & Tools: Git, GitHub, Maven, Nginx, Tomcat, VS Code

Web Stack (supporting): React.js, Node.js, Express.js, MongoDB, MySQL, PostgreSQL

EXPERIENCE

DevOps Engineer Intern

May 2026 – Jul 2026

SkilledField Mentors

Remote

- Architected and maintained end-to-end CI/CD pipelines using Jenkins and GitHub Actions, automating build, test, security-scan, and deployment stages across 3+ environments and reducing manual deployment effort.
- Provisioned and managed AWS infrastructure (EC2, VPC, IAM, RDS, EKS) through modular Terraform configurations, enabling repeatable, version-controlled Infrastructure as Code across environments.
- Containerized microservices with Docker and orchestrated workloads on Kubernetes clusters, improving deployment consistency and reducing environment-related failures.
- Embedded DevSecOps practices by integrating SonarQube SAST and Trivy CVE scanning as mandatory pipeline quality gates, blocking vulnerable builds from reaching production.
- Configured Prometheus alerting and Grafana dashboards for real-time monitoring and observability, improving incident detection and system reliability.

AWS Cloud Intern (Paid)

Jun 2026 – Jul 2026

Elevance Skill

Remote

- Deployed the Evershop e-commerce platform on AWS using Amazon ECS for container orchestration, with Docker images built and stored in Amazon ECR.
- Configured a custom domain with Route 53 DNS routing for the deployed application, aligning with production-style AWS deployment practices.
- Collaborated on production-style AWS cloud deployment tasks as part of a paid, hands-on cloud internship program.

Full Stack Development Intern

Nov 2025 – Jan 2026

Unwrite

Remote

- Built and deployed responsive MERN stack applications with RESTful APIs, improving frontend performance and cross-device compatibility.
- Implemented Node.js/Express.js backend services with MongoDB; established Git branching workflows and pull-request review processes to reduce integration conflicts.

PROJECTS

Evershop Cloud Deployment

AWS ECS, ECR, Route 53 (Custom Domain), CloudFront, ALB, ACM, AWS WAF, Docker, Terraform

- Deployed a production-style e-commerce application (Evershop) on AWS using ECS for container orchestration, with Docker images stored in Amazon ECR, and a custom domain configured via Route 53, backed by CloudFront and an Application Load Balancer for scalable, highly available delivery.
- Configured ACM SSL certificates, HTTPS, and AWS WAF to enforce security best practices; automated infrastructure provisioning with Terraform following production cloud architecture standards.

Wanderlust – Cloud-Native GitOps Deployment

AWS EKS, Terraform, Jenkins, ArgoCD, Helm, Prometheus, Grafana

- Orchestrated a multi-tier application on AWS EKS using Helm-templated Kubernetes manifests and ArgoCD for GitOps-driven continuous delivery, achieving automated sync between Git and cluster state.
- Provisioned reproducible cloud infrastructure with Terraform; embedded SonarQube and Trivy scanning in the Jenkins pipeline; configured Prometheus/Grafana for full-stack observability.

AWS Cost Optimization System

AWS, Python, Boto3, Lambda, EventBridge, SNS, CloudWatch, EC2, EBS, RDS, IAM

- Developed an automated cost-optimization solution using Boto3 to scan cloud resources and identify underutilized EC2, EBS, Elastic IP, and RDS assets.
- Automated scheduled optimization reporting with AWS Lambda, EventBridge, and SNS, enabling proactive cost governance and resource efficiency.

Netflix Clone – DevSecOps CI/CD Pipeline

Docker, Jenkins, Kubernetes, SonarQube, Trivy, AWS EC2

- Engineered a DevSecOps pipeline in Jenkins with SonarQube static analysis and Trivy container scanning as mandatory quality gates, blocking insecure images from reaching production.
- Containerized the application with Docker and executed zero-downtime rolling deployments on Kubernetes; automated EC2 provisioning via Bash scripts for repeatable environment setup.

AWS Book Management Platform

React, Node.js, MySQL, AWS EC2/RDS/S3, IAM, Nginx

- Architected a production-style 3-tier application: React SPA on S3, Node.js/Express.js REST API on EC2 behind Nginx, and MySQL on RDS, with IAM least-privilege roles enforcing secure cross-tier access.

CERTIFICATIONS

AWS Certified Cloud Practitioner Essentials — Completed training covering AWS Global Infrastructure, IAM, EC2, VPC, S3, RDS, Cloud Security, Pricing & Support, and the AWS Well-Architected Framework.

ACHIEVEMENTS & LEADERSHIP

- Solved 490+ Data Structures & Algorithms problems on LeetCode, ranking in the top percentile among peers.
- Executive Member, SBU Coding Club — led coding contests, technical workshops, and peer mentoring initiatives to build a collaborative engineering culture.
- Delivered functional prototypes at AI and Software Development Hackathons under strict time and resource constraints.
- Languages: English (Professional), Hindi (Native).
